

To all members, on behalf of the Board of Management.

The Golf Course Renovation & Design Proposal which has been before the members since early June is nearing completion after a long consultation process with members.

During this process aspects of the Design Proposal were of concern to some members, so Brett Thomson of Darby Partners was instructed to look closely at these concerns.

After an on site meeting the designer has made some changes particularly to the present 4th & 5th holes and also to the present 8th hole.

Brett has indicated that a revised plan will be available to the Club by the 31st October.

At the latest Board meeting held on the Tuesday 28th October the decision was made to make the revised plan available in the Clubhouse for members to view before the Plan is finally approved.

This notice is being sent to all members on the Club's data base as although I have addressed the members personally on several occasions on progress of the Design Proposal not all members were present at these times.

Neville Harris

Chairman
Board of Management
